

CONTENTS

Module 1

Understanding and Working with Electricity

Unit 1

Just What Is Electricity?

A Basics of Electricity

INTERESTING FACTS • Where does the word “electricity” come from?

B Electrical Conductors and Insulators

C Types and Components of Electrical Circuits

GRAMMAR CORNER • Asking questions

CAREERS • Electrician: a job in high demand

🔧 What is Static Electricity?

Unit 2

How to Carry out an Electrical Design Project

A Electrical Installations

INTERESTING FACTS • Why isn't there a standard voltage around the world?

B Electrical Design Plan

C Defining Parts of the Electrical System

D Creating the Electrical Plan

GRAMMAR CORNER • Talking about location

TOOLS AND EQUIPMENT • The tools of the trade

🔧 Electrical Testing

Let's put theory into practice •

Making an electrical design plan

Module 2

How Is Electricity Generated and Distributed?

Unit 3

Electric Motors and Generators

A Discovering Electric Motors

B Electric Motor Types

C Synchronous Generators

D Learn about Electric Machines at MIT

GRAMMAR CORNER • How to talk about the past

🔧 Electromobility

Unit 4

Energy Sources

A Coal

INTERESTING FACTS • Using passengers' steps to generate energy

B Nuclear Power Generation

C Hydro-Electric and Wind Power

INTERESTING FACTS • First uses of wind power

D Biofuels

GRAMMAR CORNER • Expressing possibility

🔧 Geothermal Energy

Unit 5

How Is Electricity Distributed?

A Transformers

B Transmission and Distribution

INTERESTING FACTS • The evolution of the electricity grid

C Electricity Deregulation

D Saving on Electricity

GRAMMAR CORNER • Joining sentences

CAREERS • Working for electric power distribution

🔧 Smart Meters Explained

Let's put theory into practice •

Designing a transmission and distribution system

CONTENTS

Module 3

Gearing up with Electronics

Unit 6

Why Electronics?

A What is Electronics?

B Resistors

C Capacitors: Reservoirs of Electricity

D Inductors

E Diodes

F Transistors

INTERESTING FACTS • The first transistor

GRAMMAR CORNER • Naming objects and elements

 History of Transistors

Unit 7

How Does an Electronic Circuit Work?

A Printed Circuit Boards

INTERESTING FACTS • The first printed circuit boards

B Let's Learn to Prototype

C Design Rules

D Circuit Symbols

GRAMMAR CORNER • Talking about past actions

TOOLS AND EQUIPMENT • The tools of the trade

CAREERS • Finding a job as a circuit designer

 Reverse Engineering

Unit 8

Amplifiers

A What Is an Amplifier?

B Classification of Amplifiers

C Operational Amplifiers

D Audio Mixers

INTERESTING FACTS • VOX Amplification

CAREERS • Working in the audio industry

GRAMMAR CORNER • Describing objects and people

 The Guitar Amplifier

Let's put theory into practice •

Designing a circuit

64

65

87

88

89

91

93

95

96

97

98

99

Module 4

Digital Electronics: What's behind It?

Unit 9

Let's Get Started with Computers

A Computational Thinking 103

B What is an Algorithm? 105

INTERESTING FACTS • Ubiquity of Algorithms 106

C Flowcharts 107

D Binary Logic 109

E Logic Gates and Truth Tables 110

INTERESTING FACTS • What were computers like before the binary number system? 112

GRAMMAR CORNER • Talking about the past 113

 Who is George Boole and why is he Important?

Unit 10

Computers: How Do They Work?

A A Look at Computer Systems 116

INTERESTING FACTS • Who designed the first microprocessor? 117

B Internal Memory 118

C Input/Output Devices 120

D Bus Architecture 121

E Has the Age of Quantum Computing Arrived? 123

CAREERS • Institute of quantum computing 124

GRAMMAR CORNER • Talking about actions 126

 DNA Computing

Unit 11

Computers: What's in There?

A Software, an Overview 128

INTERESTING FACTS • Alan Turing and breaking the ENIGMA 129

B Programming Languages 130

C Operating Systems 132

D Types of Interface Used with Operating Systems 134

E Databases 136

CAREERS • Working as programmer 138

GRAMMAR CORNER • Talking about events related to the present 139

 Saving Lives with Software

Let's put theory into practice •

Working with clients to help them buy the right computer

140

Module 5

Discovering Electronic Communications

Unit 12

How Does Information Travel Electronically?

A Cable Types

INTERESTING FACTS • The first transatlantic telephone cable

B Fibre Optics

GRAMMAR CORNER • Describing: Comparatives

C Antennas

D Satellites

INTERESTING FACTS • Where do satellites go when they die?

CAREERS • Finding a job in antenna engineering

🔗 Fibre Optics: a Global, Collaborative Invention

Unit 13

What Does Communications Media Mean?

A Radio Reception and Transmission

INTERESTING FACTS • Wireless: one word, many meanings

GRAMMAR CORNER • Talking about time

B Which TV Should You Buy?

C Mobile Phones

CAREERS • Working in the field of communications

🔗 Mobile Etiquette

Let's put theory into practice •

Planning the installation of an antenna

142

143

144

145

146

147

154

156

157

158

160

162

163

Module 6

Let's Get Connected!

Unit 14

What Are Networks Like?

A Understanding Networks

INTERESTING FACTS • What does the word "network" really mean?

B Wi-Fi

C Protocols and Routers

GRAMMAR CORNER • Describing: Superlatives

🔗 Communication Protocols

Unit 15

Going Online

A Let's Go on the Internet!

INTERESTING FACTS • A Chinese boot camp treating Internet addicts

B The World Wide Web

C Cloud Computing

D Security Policies

E Escaping your Digital Life

GRAMMAR CORNER • Expressing necessity

CAREERS • Attending courses and programs on information systems

🔗 Censorship and the Internet

Let's put theory into practice •

Formulating a network security policy

CONTENTS

Module 7

Automation

Unit 16

How Does New Technology Work as Humans Do?

- A** Automation Technology 191
- B** Programmable Logic Controllers 193
- C** PLC Inputs 196
- D** The Arduino Platform 198
- E** Smart Home Automation for Home Security 200
- GRAMMAR CORNER** • Talking about how often something happens 202
- CAREERS** • Working in automation 202
- ▶** How is a Smart Home Green? 202

Unit 17

What Is Robotics?

- A** The World of Robotics 204
- INTERESTING FACTS** • Early robots 205
- B** Parts of a Robot 206
- INTERESTING FACTS** • Robotic Surgery 208
- C** Industrial Robots on the Market: SDA5F 209
- GRAMMAR CORNER** • Making predictions 211
- ▶** Artificial Intelligence 211
- Let's put theory into practice •**
- Designing and presenting a robotic arm** 212

Module 8

Safety

Unit 18

Personal Safety

- A** Accidents at Work 215
- INTERESTING FACTS** • The World Day for Safety 216
- B** Electric Shock 218
- C** Personal Protective Equipment (PPE) 221
- GRAMMAR CORNER** • Giving orders, instructions and recommendations 222
- D** Electrical Safety - Case Studies 223
- CAREERS** • Electrical safety jobs 226
- ▶** First Aid 226

Unit 19

Environmental Safety

- A** Safe Working Practice 230
- INTERESTING FACTS** • Child labour in Great Britain 231
- B** Safety Signs 232
- C** OSHA's Approach to Hazard Identification 234
- D** Visual Display Units Hazards 237
- TOOLS AND EQUIPMENT** • Fire extinguishers 239
- GRAMMAR CORNER** • Expressing obligation 240
- ▶** The Plan, Do, Check, Act Approach to Health and Safety 241
- Let's put theory into practice •**
- Planning a safe environment for your business** 241

How to ...

- | | | | | | |
|-------------------------------------|-----|--------------------------------------|-----|--|-----|
| 1. Speed Read | 244 | 5. Describe Tables and Charts | 252 | 10. Answer an Enquiry | 262 |
| 2. Take Notes | 246 | 6. Write an Essay | 254 | 11. Use the Dictionary | 263 |
| 3. Evaluate Online Resources | 248 | 7. Write a Report | 256 | 12. Translate | 265 |
| 4. Write a Summary | 250 | 8. Make an Oral Presentation | 258 | 13. Write an Application Letter | 267 |
| | | 9. Write an Enquiry | 260 | 14. Write a Résumé | 269 |
| | | | | 15. Speak on the Phone | 272 |
